

## UPGRADE FROM HW4 AND THE HL-NT PRODUCT RANGE TO THE ROTRONIC MONITORING SYSTEM (RMS)

The final version of HW4, V3.9, is now available. The HW4 Software will be discontinued by the end of 2021. The HL-NT datalogger product range will also be discontinued by the end of 2021. The HW4 Software was released in 2003 and the HL-NT product range in 2008. Both technologies are outdated and no longer state of the art.

### PLEASE TAKE THE FOLLOWING POINTS INTO ACCOUNT:

- Products discontinued by the end of 2021
- Support available till 2023
- Microsoft updates may affect proper functioning of HW4

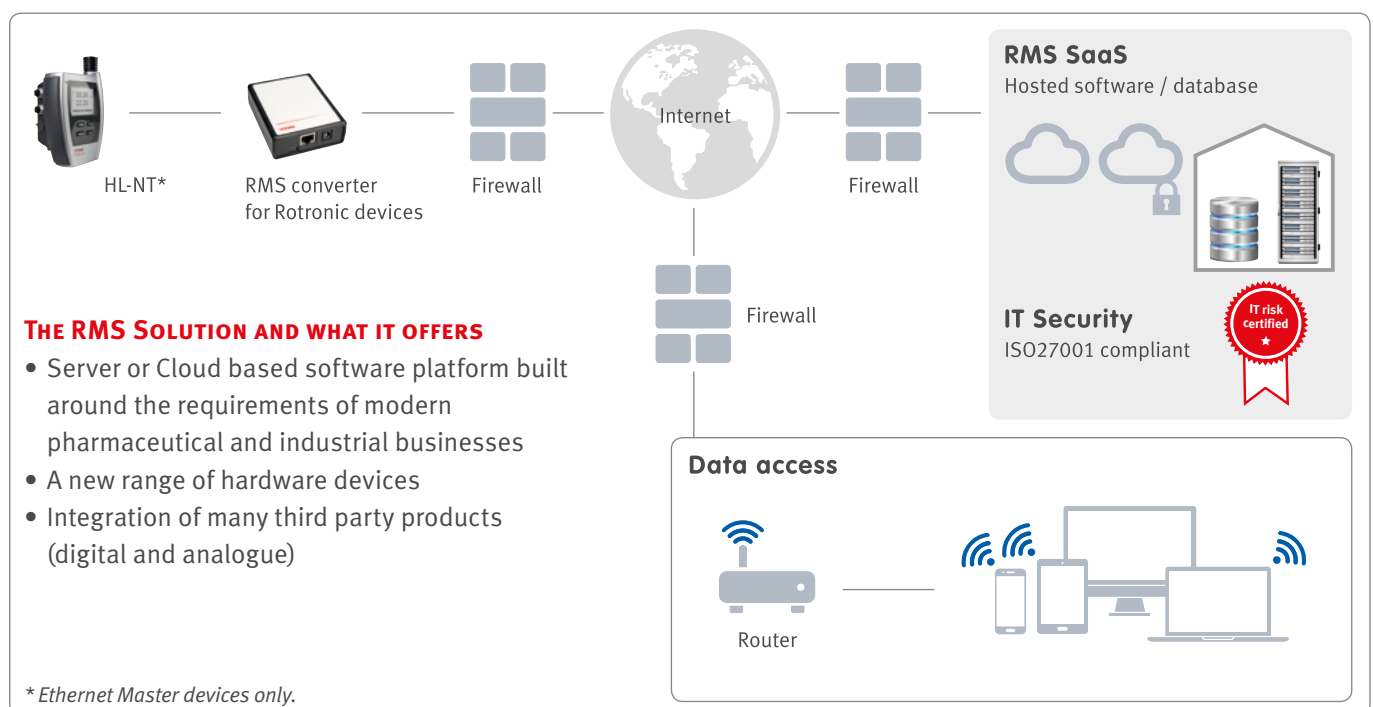

HW4  
Software

Data logger  
HL-NT

We offer an upgrade to the Rotronic Monitoring System (RMS): Keep the same hardware\* and move forward to the new generation of Environmental Monitoring Systems.

RMS is a modern continuous monitoring system that embraces open architecture and interoperability as well as providing a compliant system for validated applications.
